Company Profile

For over 50 years Pope Scientific has manufactured chemical processing equipment, engineered systems and laboratory apparatus for distillation, separation, purification and mixing applications. Along with complete turnkey processing equipment manufacturing, services offered include toll processing (customized contract distillation) for cost effectiveness and feasibility testing to demonstrate process/equipment success.

Products include: Fractional distillation systems, wiped film stills, hybrid wiped film/fractional stills, process vessels & systems and Nutsche filter-dryers. Designs accommodate lab, pilot & large-scale production capabilities. Proven applications cover edible & essential oils; foods, flavors & fragrances; vitamins & nutraceuticals; pharmaceutical intermediates & cosmetics; and many other temperature sensitive separations.
